PROFILE

"Versatile Full-Stack Developer with expertise in both backend and frontend development. Skilled in Node.js and Express.js for building robust APIs, database management, and server-side logic, as well as React and React Native for crafting dynamic web and mobile applications. Passionate about creating scalable, user-friendly applications, ensuring seamless performance from backend architecture to frontend interfaces."

WORK EXPERIENCE

Interkel Nig.
Web Development instructor
AUGUST 2024 - OCTOBER 2024

- Designed and implemented a comprehensive web development syllabus.
- Taught students fundamental and advanced concepts in frontend and backend development.
- Provided hands-on guidance in technologies such as HTML, CSS, JavaScript, React, Node.js, and Express.js.
- Assessed student progress and provided feedback to improve their coding skills.

Zee Designs
Full Stack Web developer
July 2024 - August 2024

- Developed the company's website based on provided designs using EJS and Express.js.
- Integrated MongoDB for database management.
- Utilized Git for version control and collaborative development.

Roatory
Frontend Web Developer
October 2024

- Collaborated with a team to build the company's website, focusing specifically on building user dashboards.
- Utilized React and Tailwind CSS for building responsive, dynamic user interfaces.
- Employed TypeScript for type safety and better maintainability.
- Used Git for version control and efficient collaboration with the team.

Adric Phone Stores
Full Stack Web Development
January 2025 - Present

- Spearheading the development of the company's entire website using the MERN stack (MongoDB, Express.js, React, Node.js).
- Handling both frontend and backend development, ensuring seamless integration and performance optimization.
- Writing efficient and scalable code to ensure a smooth user experience.
- Implementing RESTful APIs to manage and display dynamic data for the website.
- Utilizing Git for version control and collaboration across development teams.

TECHNICAL SKILLS

- **Frontend Development**
  - React.js – Components, props, state, hooks
  - React Native – Mobile app basics
  - JavaScript (ES6+) – Functions, event handling, promises
  - HTML & CSS – Basic structuring & styling
  - Tailwind CSS – Utility-first styling
  - Bootstrap – Responsive design & UI components
- **Backend Development**
  - Node.js & Express.js – Building APIs, routing
  - MongoDB & PostgreSQL – Database operations & querying
  - Authentication – JWT, Passport.js for user authentication
  - Testing – Jest for unit testing
  - API Development & Testing – Postman for API testing and documentation
- **Other Essential Skills**
  - Git & GitHub – Version control basics
  - API Integration – Fetching & sending data
  - Debugging – Identifying and fixing issues
